NITO Stainless Steel Industrial Spray Gun – ergonomic, light-weight, strong and easy-to-use

The NITO Stainless Steel Industrial Spray Gun is an exceptionally strong spray gun for use in environments where it may be subjected to rough treatment. Built for workshops and production environments where the gun may be exposed to shocks and impacts. The NITO Stainless Steel Industrial Spray Gun is a high-quality product that never falls. The soft plastic housing is shockproof and non-staining. Sealed cased to prevent penetration of dirt.

Application:

For flushing and cleaning jobs in industry and trades requiring a robust gun that can withstand shocks and save water when in use

For water with or without soap solution, e.g. for rinsing, washing, flushing and soap dispensing

Infinitely adjustable dispersion, from a concentrated jet to a 60° spray

Dispersion can be adjusted using a tool

Low-pressure spray gun with pencil/cone jet adjustable via trigger and knob

Light and easy to use

Can operate at different temperatures and different pressures for a wide range of applications

Technical specifications
